

THANK YOU FOR YOUR PURCHASE!

To install your pack
just follow those *two
simple steps*:

1. Double click on the .DRFX file and select "Install"
2. If your download include a font folder. Open the folder, select all the fonts included and double click on them to start the installation process.

(It's very important that the fonts are installed, without them, DaVinci will not know which font to use, resulting in a black screen)
